Who we are

9liveX is one of the leading fiber network infrastructure companies, specializing in building and managing commercial and low-cost telecoms networks. 9liveX is a licensed carrier and fiber network operator.

We design, build, operate, and maintain telecommunication networks. In particular, 9liveX's network infrastructure builds comprise the final section (or 'last mile') of the telecommunication networks, connecting homes, buildings, apartments, and commercial premises to a central exchange point.

From this central point, high-speed broadband internet, data, entertainment, and other telecommunication services are delivered to end-user consumers via third-party providers of retail internet and other telecommunication services.

EXPERTISE

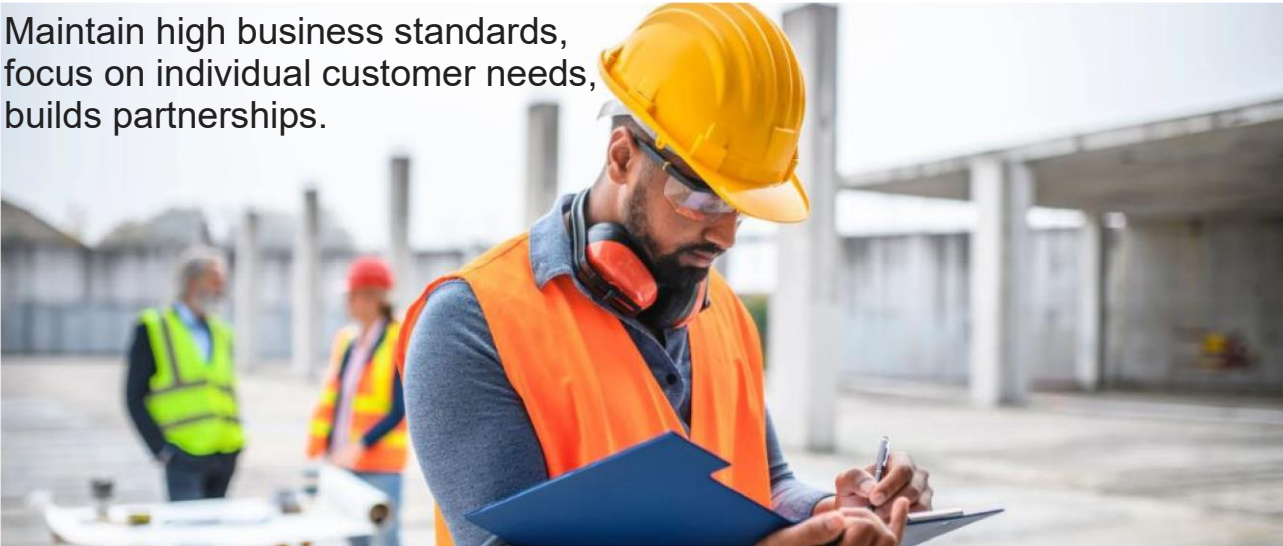

Over 20 years of experience and a talented team, we bring unmatched expertise to every project we undertake.

INTEGRITY

TECHNOLOGY

We keep up to date with the latest technological advancements to ensure the latest methods is use when building infrastructure.

Maintain high business standards, focus on individual customer needs, builds partnerships.

PROJECT MANAGEMENT

Our dedicated project management team ensures that your network infrastructure is delivered on time and within budget.

DIVERSITY

Our diverse corporate culture gives us access to different perspectives and ideas. We aim to establish a high-performance environment

where individual differences of employees are valued.

Company Vision & Values

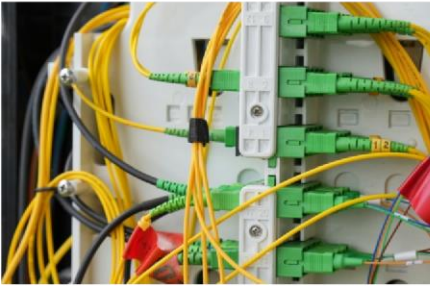

We provide your project with a turnkey solution, providing superior safety, quality, planning, and communication to successful project formation. With the latest technology, equipment, and enviable operational standards in quality, environmental, and safety, we attract highly experienced personnel.

Our Mission

We are committed to achieve excellence in the industry and provide a high end quality product and service to our clients

Our professional conduct will establish a track record of industry excellence. Our standard of work will set the benchmark for future project specifications. We will create a desired place of work, a natural home for innovation, enthusiasm, and personal safety.
